Re: Sewer expansion to 91 Willis Farm Rd.

Dear Mr. Alberghini,

Bob and Joy Reap have come before the Water and Sewer Commission to discuss expanding the Water and Sewer District to include 91 Willis Farm Rd. Their intention is to construct a private sewer force main to the property, thus expanding the number of users that Richmond Water and Sewer would be serving. The Water and Sewer Commission is in favor of this expansion as there is excess capacity at the Wastewater Treatment Facility. More users on the system will have a positive benefit on rates of all users by spreading the costs to more customers.

It is the Commission's understanding that in order to complete this project the Reap's will need to secure an easement from MMUUSD for the placement of their force main on MMUUSD property at Camel's Hump Middle School. Please consider this a letter of support for this project while you consider granting this easement.

Sincerely,

Bard Hill
Chair, Richmond Water and Sewer Commission
